

Press Release

Xativa Laminators from ArtSystems

January 2004 sees ArtSystems launch the Xativa series of laminators. The objective is to supply customers with reliable, affordable solutions with a full technical back up service for the customer, including installation, training and on going maintenance support.

The Xativa series consists of six models ranging with both hot and cold lamination, mounting and encapsulation, including a multi-purpose machine, and is aimed at the wide format print finishing, point of sale, signage and vehicle livery markets. Most of the models within the range come in various sizes up to 65" wide and are able to laminate items up to 15mm in thickness on various media.

ArtSystems Sales Director, Steve Hawker said, "It is our aim to supply no nonsense lamination to the market which is simple but productive and we believe this is achievable with the Xativa laminator range. They are mid-price, high output and very reliable and in making these additions to our wide-format printing and imaging solutions, we are continually strengthening our 'one-stop shop' product offering for our customers."

All Xativa laminators are supplied with a 3-year parts warranty, which can be extended for another 3 years at an additional cost. ArtSystems will provide on site installation, training and service where necessary and fully trained in-house personnel can provide excellent service support by telephone.

As the Xativa range of laminators produce high quality finishing in a safe, fast and economical way, ArtSystems also supplies standard hot and cold film, from stock, in sizes suitable for the wide-format industry. A Xativa media and film guide is supplied on request for ease of selection.
